Paraskevi Sapountzi		

Description:

This new title in the well established *Colour Handbooks* series combines the advantages of a short text book with those of a colour atlas. Reflecting the great advances in biochemical and radiological investigation, the authors also emphasise that diagnosis of many endocrine diseases still relies on the clinical acumen of physicians.

The *Colour Handbook* is a compact yet complete guide to the diagnosis and treatment of endocrine and metabolic disorders. It provides thorough discussion of each disease and a wealth of colour images. The book is of value to young physicians/residents, to trainee endocrinologists and to senior medical students.

Contents:

1. Thyroid disorders, 2. Diabetes mellitus, 3. Metabolic bone disorders, 4. Hypothalamic-pituitary disorders, 5. Adrenal disorders, 6. Reproductive disorders, 7. Lipid disorders, 8. Multiple endocrine neoplasia, neuroendocrine tumours and other endocrine disorders, Index.

192 pages
234 x 156 mm page size
269 colour illustrations
Softcover
Price: £29.95
ISBN 978-1-84076-121-4
Publication: 2009
