unspecified
Hardback
ISBN: 978-1-84076-112-2
Price: £69.95
Publication: October 2010

Bob Doneley

School of Veterinary Science, University of Queensland

Description:

Interest in avian medicine has evolved and it is now one of the fastest growing areas in veterinary medicine. In this concise practical and beautifully illustrated book, early chapters deal with anatomy and physiology, physical examination and advice on how to interpret diagnostic tests. Disorders affecting the different body regions and systems make up the majority of the book from the external (skin and feathers, eyes, legs and feet) to the internal including the gastrointestinal tract and the cardiovascular system. Further aspects of avian medicine discussed in the book include behavioural problems, surgery and formulary. In light of 25 years of clinical practice in avian medicine, the author has written this book as a quick reference for clinicians, and as a study guide for undergraduate and post-graduate veterinary students.

Contents:

Contents
1 Clinical anatomy and physiology
2 The physical examination
3 Clinical techniques
4 Interpreting diagnostic tests
5 Supportive therapy
6 Differential diagnosis
7 Disorders of the skin and feathers
8 Disorders of the beak and cere
9 Disorders of the eye
10 Disorders of the ear
11 Disorders of the legs, feet and toes
12 Disorders of the musculoskeletal system
13 Disorders of the gastrointestinal tract
14 Disorders of the liver
15 Disorders of the pancreas
16 Disorders of the respiratory system
17 Disorders of the cardiovascular system
