# Acne, Rosacea and Other Facial Dermatoses

**1st edition**

**David J. Goldberg, MD, JD**  
Skin Laser and Surgery Specialists, New York

**Alexander Berlin, MD**  
Dallas, Texas

## **Description:**

Acne, rosacea and sebaceous hyperplasia are very common skin problems that have a medical and cosmetic impact on the daily lives of millions of people. This book covers both the medical and cosmetic treatments of these skin disorders including all clinical aspects of the condition, aetiology, epidemiology, diagnostic challenges, and the latest theories on pathophysiology.

This is followed by chapters dealing with current medical therapeutics and laser treatments available for each of the conditions. In the case of acne, a separate chapter is dedicated to the treatment of acne scarring, a common and frequently psychologically-marring consequence of this common disease.

This book is of use to dermatologists in practice and training, to plastic surgeons, general physicians and to all healthcare personnel working in the administration of phototherapy and laser treatment for acne and rosacea.

## **Contents:**

1. Acne vulgaris - epidemiology and pathophysiology, 2. Acne vulgaris - current medical therapeutics, 3. Lasers and similar devices in the treatment of acne vulgaris, 4. Treatment of acne scars, 5. Rosacea - epidemiology and pathophysiology, 6. Rosacea - current and medical therapeutics, 7. Lasers and similar devices in the treatment of rosacea, 8. Lasers and similar devices in the treatment of sebaceous hyperplasia, Index.
