192 pp, softcover
210 x 148 mm page size
275 colour and b/w illustrations
ISBN: 978-1-84076-099-6
Price: £24.95
Publication: 2010

Description:

This new addition to the Veterinary Self-Assessment Colour Review series covers all types of feline infectious diseases. It includes infections caused by viruses, bacteria, parasites and fungi. The 199 clinical cases are presented randomly, as in practice, but the wide range of cases cover infectious diseases which effect all the organ systems of the cat.

The illustrated clinical cases contain integrated questions and detailed explanatory answers. The book will appeal to professionals in practice and in universities, and to veterinary students, veterinary nurses and technicians.

Readership:

Veterinarians in training and practice.
Veterinary nurses and technicians.

Key Features:

- Includes all types of feline infectious diseases: viral, bacterial, parasitic and fungal.
- Problem-oriented self-assessment format
- Superb colour illustrations
