**Michael Pees**  
University of Leipzig, Germany.

**Sven Reese**  
University of Munich, Germany.

**Thomas Tully**  
Louisiana State University, Baton Rouge, USA.

## **Description:**

This comprehensive atlas covers birds, small mammals and reptiles. All imaging techniques have been included: radiography, sonography, CT and MRI. It is an ideal supplement to literature presently available on imaging diagnostics for small animals.

The book is divided into sections for each type of pet so that relevant information and visual references can be rapidly consulted. Every section begins with the anatomical illustration of the relevant part of the body with respect to each of the individual diagnostic procedures. In the second part of the book, the most common pathological conditions are depicted according to organ system and discussed comparatively. This comparative presentation enables a quick and correct diagnosis in conjunction with using the most suitable diagnostic techniques.

All radiographic, sonographic, CT and MRI images are clearly labelled. Containing over 1,400 illustrations, this atlas will be an
