

Ophthalmic Disease in Veterinary Medicine

Charles L. Martin, DVM, MS, DACVO
Emeritus Professor, College of Veterinary Medicine,
University of Georgia, Athens, USA.

Contributing Authors:

David Whitley, DVM MS and Kristina R Vygantas DVM
Both at the College of Veterinary Medicine, Auburn University,
AL, USA.

Description: The softcover edition of this comprehensive, superbly illustrated textbook contains key updates to the text and references, reflecting the main developments in science and in practice since first publication. It is aimed squarely at veterinarians in practice and training interested in all types of ophthalmic diseases and disorders. Species coverage is mainly dog and cat with additional material on the horse and the cow.

Following an outline of the basic elements of ophthalmic science relevant to study and practice, the author provides a detailed description and discussion of each condition including aetiology, clinical signs, diagnosis, prognosis and therapy, plus a chapter on problem-oriented ophthalmology.

Dr Martin has filled an important gap in veterinary ophthalmic literature and has created a valuable resource, focusing throughout on the clinical needs of the practitioner and the student.

Contents: 1. The Ophthalmic Examination and Anamnesis, 2. Ophthalmic Pharmacology, 3. Basic Ocular Pathology, 4. Problem Based Management of Ocular Emergencies, 5. Principles of Ophthalmic Surgery, 6. Orbit and Globe, 7. Eyelids, 8. Conjunctiva and the Third Eyelid, 9. The Lacrimal System, 10. Cornea and Sclera, 11. Anterior Uvea and Anterior Chamber, 12. Glaucoma, 13. Lens, 14. Vitreous and Retina, 15. Presumed Inherited Ocular Disease. Appendix 1 – Breed Dispositions to Eye Disease in Dogs. Appendix 2 – The Ocular and Adnexal Relationship to Medicine. Appendix 3 – Glossary. Index.

New for 2009

Updated text / references
Softcover edition
