Wood

Description:

The internationally respected editors and authors have combined to produce this major new textbook and reference source in a single volume, covering all aspects of equine medicine, surgery and reproduction. The text is supported by a wealth of over 1200 illustrations of the highest quality – colour photographs, radiographic and ultrasound images, and diagrams. The book is system-based and each individual system is introduced with precise information on the relevant basic anatomy and physiology, standard clinical examination techniques and useful differential diagnostic aids. This is followed by diseases and disorders that are pertinent to that system, grouped together either anatomically or based on presenting clinical signs. Each condition is described using consistent headings – definition/overview, aetiology and pathophysiology, clinical presentation, diagnosis, differential diagnoses, management/treatment, and prognosis. Additional chapters deal with the foal, with wounds and behavioural problems.

Contents:

Contents
1 Musculoskeletal system
2 Reproductive system
3 Respiratory system
4 Gastrointestinal system

1056 pp
280 x 216mm
1361 Illustrations, colour
Hardback
ISBN: 978-1-84076-119-1
Price: £125.00
Publication: February 2011

Subject:

Equine veterinary medicine

Readership:

equine specialists,
non-specialist veterinary
practitioners, students in
veterinary medicine and
related equine courses

Key Features:

- Major new single volume
- International editors and authors
- System based: basic science, investigations, clinical conditions
- Over 1200 top quality illustrations
