Royal College of Veterinary Surgeons Specialist in Veterinary
Dermatology, Godiva Referrals, Coventry, UK

Patrick J. McKeever, DVM, MS, DACVD
Associate Professor, College of Veterinary Medicine, The University of
Minnesota, St. Paul, Minnesota, USA.

Following its super-success and the critical acclaim for the First Edition, Manson Publishing/The Veterinary Press is proud to announce publication of the Second Edition of *Skin Diseases of the Dog and Cat*.

The strengths of the First Edition have been preserved:
Problem-oriented approach: the book is arranged in twelve chapters covering dermatoses classified by their principal presenting sign.
Concise systematically structured text: definition, aetiology & pathogenesis, clinical features, differential diagnoses, diagnostic tests, management. Focus is on clinical practice and the need to explain the disease to the owner.
Superb and generously-sized colour photographs and diagrams.
Clear user-friendly design - one condition per page or spread of pages.
Referenced throughout to give the clinician access to the literature.

Within this framework and in light of the exponential growth of information in small animal dermatology since first publication, the authors have revised the entire text for the new Second Edition, added twenty-one new sections and one hundred and thirty-one new color photos.

The result is a Handbook that is practical, extensive and up-to-date in its content, beautifully illustrated and designed. The new Second Edition is of lasting value to veterinary practitioners and students, veterinary nurses and technicians.

Contents: 1. Pruritic dermatoses. 2. Nodular dermatoses. 3. Ulcerative dermatoses. 4. Papular and pustular dermatoses. 5. Diseases characterised by sinus formation. 6. Diseases characterised by crust and scale. 7. Environmental dermatoses, 8. Focal alopecia. 9. Pigmentary abnormalities. 10. Hormone-related dermatoses. 11. Otitis externa. 12. Disorders of the nails. References. Index.

Conditions new to this edition include: Facial dermatitis of persian and himalayan cats, Spiculosis, Calcinosis circumscripta, Canine eosinophilic granuloma, Sterile granuloma and pyogranuloma syndrome, Cutaneous asthenia (Ehlers-Danlos Syndrome), Epidermis bullosa acquisita, Feline idiopathic ulcerative dermatitis, Mucocutaneous pyoderma, Proliferative arteritis of the nasal philtrum, Vasculopathy of grayhounds, Vesicular cutaneous lupus of the shetland sheepdog and collie, Metatarsal fistulation of the german shepherd dog, Acrodermatitis of bull terriers canine ear margin seborrhea, Exfoliative cutaneous lupus of the german shorthaired pointer, Topical corticosteroid reaction, Alopecia X, Acquired pattern alopecia, Cyclical flank alopecia, Feline paraneoplastic alopecia.

384 pp
234 x 156 mm page size
386 colour and b/w illus.
Hardcover
ISBN 978-1-84076-115-3
Price: £39.95
Publication: 2009

Readership:
Veterinary practitioners.
Veterinary students.
Veterinary technicians/nurses

Key Features:

- International authorship reflects work at university and in clinical practice.
- Problem-oriented: diseases arranged by principal presenting sign.
- Concise structured text and clear design for.
- Extensive coverage, focus on more common dermatoses.
- Top quality colour photography
