Description:

On first publication *Clinical Medicine of the Dog & Cat* was hailed by the market and reviewers as a ground breaking work being the first fully illustrated textbook of small animal clinical medicine. The first edition was extremely successful. In this major revision, the coverage and world class author team have been further enriched by the addition of new chapters on Immunology, Nutrition, Fluid Therapy, Pain Management and Clinical Toxicology.

While covering all the major areas of internal medicine of the dog and cat, the emphasis is on brevity and the more common disorders. The book is organised by body system, and each chapter is structured in a consistent way, providing the definition of each disorder, its causes, clinical features, differential diagnoses, diagnosis and management options.

This practical, focused text is richly illustrated throughout by 1,505 clinical colour photographs, imaging, diagrams and tables (450 additional pictures to the first edition). It will be of lasting value to practitioners and students as a learning resource and permanent reference.

Contents: 1. Dermatologic disorders, 2. Ophthalmologic disorders, 3. Infectious diseases, 4. Cardiovascular disorders, 5. Respiratory disorders, 6. Hematologic disorders, 7. Immunologic disorders, 8. Gastrointestinal disorders, 9. Liver disorders, 10. Pancreatic disorders, 11. Nutrition for the critically ill patient, 12. Endocrine disorders, 13. Urinary disorders, 14. Fluid therapy, 15. Reproductive disorders, 16. Neurologic disorders, 17. Musculoskeletal disorders, 18. Pain management, 19. Clinical toxicology. Index.

760 pp, hardcover
1,505 colour & b/w illustrations
280 x 216 mm page size
ISBN: 978-1-84076-111-5
Price: £85.00
Publication: 2009
